

COSMOS GARDEN

CHLOROPHYLL

(wood)

Conifers, ferns, mosses Flowering plants, lichen and algae
All algae, Plantae and Fungi
The chlorophyll bodies, the rhizomatic bodies
The unicellular and multicellular fluid bodies
Made of water and sugar
Made of minerals and dust
Stretched between sky and ground
Sensing and listening
Reading light and shadow
Reading wavelengths
Measuring time
Carefully
Making the world
Together
Always together

FIRE

(movement from gut towards the composting bodies)

SOIL

(earth)

Dust, dirt, sand, silt, clay
Rocks - solid and unstable
Billions of organisms
Water and gasses
Accommodating, supporting, nurturing life of
The lithosphere, the hydrosphere, the atmosphere, the biosphere
Gathering, crystallizing,
Concentrating, layering, swelling
Transforming
Seeds, roots, rhizomes
Extending and spreading growing from the middle growing from the ends
Sending signals
Chemicals, vibrations, resonance
Traveling from cell to cell
Through the dense, through the dark
Through the gasses, through the voids
Vegetal, mineral, animal bodies
Gradually falling apart
Decaying and burning
Energy Transforming

METAL

(movement from blood towards the rhizomes)

CLOUD

(water)

Mutating body of water

Mass of minute droplets, frozen crystals and particles

Coupled with air

Surrendering to the currents

The majestic drift

Protective layer dancing through the atmosphere hiding and reflecting light

Patterns of humidity, of pressure, of temperature

Transforming and moving

Falling, spilling, spreading, seeping

Flowing through us

Flowing through us all

The rain, rain, rain, rain, rain the clouds

Connected in breathing

In cellular slime

The the time itself (no repetition)
